EDUCATION

Université du Littoral Côte d'Opale

Calais, France | 2022 – Present

PhD. in Probability

Thesis: IDLA aggregates and forests with sources in a hyperplane of $\mathbb{Z}^d$

- Conducted research supervised by Nicolas Chenavier (Université du Littoral Côte D'Opale), David Coupier (IMT Nord Europe) and Arnaud Rousselle (Université Bourgogne Europe) on IDLA, a random growth model & submitted to Probability Theory and Related Fields)
- Developed and ran large computer simulations on University clusters in Python and C++ for visualization of the model
- Presented results and findings at various seminars and conferences
- Attended a weekly Probability and Statistics seminar, as well as a Workshop on spatial Point Processes at the University of Lille

Sorbonne Université

Paris, France | 2021 – 2022

MSc. in Probability and Random Models, High Honors, GPA: 3.7

Thesis: Concentration inequalities for U-Statistics

Relevant courses: stochastic calculus & SDEs, statistical learning, random walks, determinantal point processes, concentration inequalities, Poisson processes & applications to biology

Université Paris Diderot

Paris, France | 2020 – 2021

MSc. in Fundamental and Applied Mathematics, Highest Honors, GPA: 4.0

Relevant courses: advanced algebra, advanced calculus, advanced probability, PDEs & spectral theory, Bayesian statistics & tests, financial mathematics

PROFESSIONAL EXPERIENCE

Université du Littoral Côte d'Opale

Calais, France | 2023 – Present

Teaching Assistant

- Conducted a weekly lecture in Calculus for Bachelor students (50 students over two years); graded weekly quizzes; designed, authored and graded the final exam
- Led a tutorial session to introduce Bachelor students to programming in R (100 students over two years); taught the students to use Rstudio for statistical visualization, such as basic illustrations of LLN, CLT, or Monte-Carlo Methods

Private Tutor

Paris & Lille, France | 2020 – Present

Tutored Middle & High School Students in Mathematics, Physics and Chemistry

Laboratoire de Probabilités, Statistiques et Modélisation

Paris, France | May – Sept.

Research Internship

2022

- Conducted academic research on Concentration Inequality theory
- Thesis titled *Concentration inequalities for U-statistics*, under the supervision of Anna Ben-Hamou; Final grade 18/20 (GPA: 4.0)

SKILLS

Technical skills: Python, R, C++, LaTeX, Git, HTML/CSS

Languages: English (Native), French (Native), German (Professional Working Proficiency), Russian (basic)

INTERESTS

Basketball , Football, Tennis, Chess

Cello: played for over 8 years
